## EXHIBIT 99.1

# Iterum Therapeutics Receives FDA Acceptance of Resubmission of NDA for Oral Sulopenem for the treatment of Uncomplicated Urinary Tract Infections

--Oral Sulopenem NDA has been assigned a PDUFA action date of October 25, 2024--

DUBLIN, Ireland and CHICAGO, May 31, 2024 (GLOBE NEWSWIRE) -- Iterum Therapeutics plc (Nasdaq: ITRM) (the Company), a clinical-stage pharmaceutical company focused on developing next generation oral and IV antibiotics to treat infections caused by multi-drug resistant pathogens in both community and hospital settings, today announced that the U.S. Food and Drug Administration (FDA) has acknowledged receipt of the resubmission of the New Drug Application (NDA) for sulopenem etzadroxil/probenecid (oral sulopenem) for the treatment of uncomplicated urinary tract infections (uUTIs) in adult women. Under the Prescription Drug User Fee Act ("PDUFA"), the FDA has deemed the Company's NDA resubmission to be a Class II complete response which has a six-month review period from the date of resubmission. As a result, the FDA has assigned a PDUFA action date of October 25, 2024.

"We are very pleased that the FDA has accepted the resubmission of the NDA for oral sulopenem," said Corey Fishman, Chief Executive Officer. "This significant milestone brings us one step closer to the potential approval of oral sulopenem for uUTIs providing patients and physicians with a much-needed treatment option for this underserved market. We look forward to continuing to work with the FDA during its review."

The resubmission includes additional evidence from the REASSURE (REnewed ASsessment of Sulopenem in uUTI caused by Resistant Enterobacteriales) clinical trial, conducted under Special Protocol Assessment agreement from the FDA, comparing oral sulopenem to oral Augmentin® in adult women with a uUTI, demonstrated that oral sulopenem was non-inferior to Augmentin® for the primary efficacy endpoint of clinical and microbiologic response at the test-of-cure visit for patients with an Augmentin® susceptible pathogen, with the difference in the overall success rate demonstrating statistically significant superiority of oral sulopenem versus Augmentin®.
